The Prayer Time for LHIC (41°11'03"S, 174°57'14"E) is calculated using the following parameters;

1. Sun angle for Fajr = 16°\* & the sun angle for Isha = 15°; 2. Sunrise and sunset times are adjusted to 150m elevation above sea-level to adjust for muslims living in suburbs on Western hills; 3. Asar time is based on single shadow and Isha time based on Shafaq Al-Ahmar is 15 minutes earlier.

\* Fajr angle is 1° lower than the Islamic Society of North America (ISNA) method; therefore, Fajr time starts approximately 5 minutes earlier. This is in accordance with the prayer times mentioned on IMAN's website.
